Subject: Rules for Wastewater Disposal

The following are from the Utah State Rules R317-4. The Central Utah Public Health Department is responsible for enforcing these rules within their district.

Rule R317-4. Onsite Wastewater Systems:

2.3. Failure to Comply With Rules. Any person failing to comply with This rule will be subject to action as specified in Section 19-5-115 and 26A-1-123.

2.4. Onsite Wastewater System Required. The drainage system of each dwelling, building or premises covered herein shall receive all wastewater (including but not limited to bathroom, kitchen, and laundry wastes) and shall have a connection to a public sewer except when such sewer is not available or practicable for use, in which case connection shall be made as follows:

A. To an onsite wastewater system found to be adequate and constructed in accordance with requirements stated herein.

B. To any other type of wastewater system acceptable under R317-1, R317-3, R317-5, or R317-560.

2.6. No Discharge to Surface Waters or Ground Surface. Effluent from any onsite wastewater system shall not be discharged to surface waters or upon the surface of the ground. Sewage shall not be discharged into any abandoned or unused well, or into any crevice, sinkhole, or similar opening, either natural or artificial.

2.7. Repair of a Failing or Unapproved System. Whenever an onsite wastewater system is found by the regulatory authority to create or contribute to any dangerous or unsanitary condition which may involve a public health hazard, a malfunctioning system, or deviates from the plans and specifications approved by such health authorities, the regulatory authority may order the owner to take the necessary action to cause the condition to be corrected, eliminated or otherwise come into compliance.

For onsite wastewater system requirements or if you have any questions or concerns, please contact the Central Utah Public Health Department.

Thanks,
