

## Stream Alteration Permit

This is a letter I received about culverts or bridges over the streams from the Utah Division of Water Rights, please read and follow the instructions for the permit. After getting the permit please send a copy with your site plan and checklist to the Environmental Board Member to get approval from the association.

Troy,

For work that would alter a natural stream channel, the property owner would need to obtain a stream alteration permit from our office prior to construction. Blank applications can be found on our website here:

<http://www.waterrights.utah.gov/strmalt/forms.asp>

Processing takes between 20 to 30 days. Generally, the permit issued will contain conditions of approval. If you would like to view our administrative rules and Utah Code, you can view them here:

<http://www.rules.utah.gov/publicat/code/r655/r655-013.htm>

<http://le.utah.gov/xcode/Title73/Chapter3/73-3-S29.html>
